ABSTRACT: This essay arose out of a new intellectual stream that specifically aims at understanding the role of politics in the social production of space. It explores how environmental design is not merely a technical or aesthetic endeavor, but also a political act that shapes and reproduces social structures. By analyzing the political syntax of American environmental design tradition, the essay seeks to reveal how ideology is inscribed into the built environment and how this process is negotiated and performed through architectural interventions.

THE CONCEPT OF ENVIRONMENTAL DESIGN WITH A CASE STUDY

Grove M

ABSTRACT: If “green” is an environmental concept applicable to the design and construction of buildings and landscapes, then we must critically examine its role in contemporary design practices. This study offers a case study of an environmentally conscious building project, concluding by offering suggestions for future designers interested in reducing the environmental impact of their buildings.
