**THE CONCEPT OF ENVIRONMENTAL DESIGN WITH A CASE STUDY**

Grove M

*J Art Arch Stud, 1(1): 24-31, 2012*

**ABSTRACT:** If “green” is an environmental concept applicable to the design and construction of buildings and landscapes, then we need to understand its meaning in the context of those built environments. If we are to avoid the environmental problems that have been produced by our current design processes, we must begin to understand and employ the concepts of “green” and “greening” as more than just slogans.

We conclude by offering suggestions for future designers interested in reducing the environmental impact of their buildings.
